

MOTORSPORT SOUTH AFRICA – ENVIRONMENTAL POLICY

Motorsport South Africa (MSA) is committed to providing the necessary leadership to ensure that all categories of motorsport under its auspices reduce their impact on the natural environment.

MSA will achieve this by focusing on the following:

1. Implementation of an effective Environmental Code & Management Plan.
 2. The appointment of an Environment Panel, which will be responsible for the implementation, evaluation and review of MSA's environmental efforts.
 3. Actively educate and raise awareness among MSA staff, competitors, event organisers and venue owners to understand and to minimise their respective environmental impacts.
 4. The training and appointment of accredited MSA Environmental Officers to ensure that all motorsport role-players comply with the MSA Environmental Code at MSA events.
 5. Annual review of the Environmental Code to ensure that it also addresses relevant national environmental legislation and current best practice.
 6. Openness and transparency with regard to environmental improvement and communications.
